Reply to Office Action dated March 17, 2006

PATENT
450100-05009

IN THE SPECIFICATION

Please amend the Abstract as follows:

--A special effect device by which ~~an entirely a~~ new special picture effect is to be implemented in accordance with a read address control system. The device includes an address signal generating unit 3 which generates a readout address signal for picture signals stored in a frame buffer 2 so that the picture signals stored in the frame buffer 2 will be output as an array of ~~m times n reduced size pictures on a display picture surface, where m and n are natural numbers~~ to each of a plurality of corresponding triangular areas of a preset size fractionated from the picture signals stored in the frame buffer.--
